Teaching

Courses Taught (4)

Teaching & Learning with Technology (Undergraduate, online, 6x) 2017-present

- * Course topics include design thinking, universal design for learning, media & information literacy, professional learning networks, computational thinking, and play-based learning.
- * Students develop plans for integrating technology in classroom.
- * The semester-long project is to design a professional online portfolio.

Learning Technology through Design (Master's, online, 3x) 2018-present

- * Course topics include design thinking, the design process (empathize, define, ideate, prototype, test), designing for learners, iterative design. and collaboration in design.
- * Students discuss examples of good and bad designs from everyday life.
- * The semester-long project is to work through one cycle of the design process to address a *problem of practice* from the student's professional context.

Electronic Assessment for Teaching and Learning (Master's, online, 2x) 2018-present

- * Course topics include foundational theories of assessment, formative assessment, feedback, and a critical examination of methods for assessment (e.g., portfolios, rubrics, surveys, tests, self-evaluations).
- * Students develop an *assessment design checklist* to use in their own professional practice.
- * The semester-long project is to plan a *formative assessment design* to implement in their own context.

Teaching Students Online (Master's, online, 1x) 2017

- * Course topics include foundations for online learning, course management systems, various models of online course design, instructor-student communication, assessment, universal design for learning, and online classroom management.
- * Students playfully explore Google Apps, CMSs, screencasting tools, and file management systems.
- * The semester-long project is to design a curriculum for an *online course module* of 3-5 interconnected lessons, which may include training sessions or non-traditional courses.

Instructional Activities & Workshops (10)
